**Claims 1 – 6 are pending.**

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration acknowledges the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56.

The instant declaration filed December 23, 2005 states "I acknowledge the duty to disclose information which is material to the examination of this application in accordance with Title 37, Code of Federal Regulations, § 1.56". The word "examination" needs to be replaced with - - patentability - -.

2. Claims 1 – 6 are allowed.

3. The following is an examiner's statement of reasons for allowance: the prior art of record neither shows nor teaches a combination for the claimed apparatus that comprises in combination with other recited elements, a tube installed to penetrate through the differential pressure generation element; a pressure sensor received in the tube to detect the differential pressure in the flow passage generated by the differential pressure generation element.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3753

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
